*Note: Claims 13-17 and 20-30 are allowed and have been respectively renumbered upon allowance as claims 1-2, 5, 3-4, and 6-16.*

***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance:
  - Applicant's amendments have obviated the 112, paragraph 2 rejections of the prior office action. The unitary valve is viewed as a unitary valve body of resilient flexible material that includes a bypass valve portion as claimed. Note that "the bypass valve portion being configured as a collar" of claim 23 is considered as the antecedent basis of "the collar portion" of claim 24.
  - The closest cited art—Suzuki, Palmai, Buckman and JP2000-140525—fail to anticipate or render obvious, alone or in any proper combination, the spaced projections of the unitary valve body that are (i) upstream of the sealing portion; (2) disposed between and engaging both the bypass valve portion and the filter element; and (3) having the capability for allowing direct fluid pressure application to the sealing portion for unseating thereof from the filter element allowing a bypass flow—within the embodiments of the independent claims. In JP'525, the projections 36 are downstream from the sealing portion 34 and the sealing portion 34 does not unseat for bypass flow. In Suzuki, projections 33 are part of the filter element and are not part of the unitary valve as in the instant claims. In Palmai, the ribs 27 are interior of the valve and do not engage the filter element but a flange 26 of the valve. In Buckman, elements 25 are downstream of the sealing portion.
